

Atos Identity Security Services: Elevate Your Identity Access and Management Strategy

Atos

In today's interconnected world, managing access to your digital assets is paramount. Identity security and access management is the cornerstone of a robust security strategy, ensuring that only authorized individuals can access sensitive information and critical systems. Atos Identity security service offers a comprehensive suite of solutions designed to empower your organization with unmatched security and control.

The Growing Importance of Identity Security

As businesses rely more on digital technologies, cyberattacks are becoming more sophisticated. Privileged Access Management(PAM) in the Modern Threatscape reports that 74% of data breaches begin with the misusing of privileged credentials¹. Recent high-profile breaches have cost companies millions in recovery and fines. Identity security and access management is essential to mitigate these risks. By controlling access to systems and data, Identity security solutions help prevent unauthorized access and protect your organization's reputation and bottom line.

Atos: Your Trusted Identity Security Partner

Atos is a leading provider of innovative and intelligent Identity security and access management solutions. With over 25 years of experience implementing identity security solutions for Fortune 500 companies, Atos has a proven track record of success. Our team of experts understands the unique challenges faced by different industries and can tailor solutions to meet your specific needs, from delivering a single project or service to delivering a complete Identity security program so your team can focus on your core business.

Benefits of Atos Identity Security

Enhanced Security

Safeguard your critical assets and prevent unauthorized access with our robust Identity security solutions. Our multi-factor authentication and privileged access management solutions help prevent unauthorized access to sensitive data. We'll help you implement strong identity verification, granular access controls, and real-time threat detection to keep your data safe.

Optimized User Experience

Provide seamless and secure access for your users while enhancing their productivity. Our solutions offer single sign-on (SSO), password less authentication, and self-service capabilities, improving user satisfaction and productivity.

Improved Compliance

Meet regulatory requirements and industry standards with our comprehensive compliance tools. Atos Identity security helps you comply with regulations like GDPR, HIPAA, and SOX, avoiding costly penalties and reputational damage. Our solutions provide detailed audit trails and reporting capabilities to demonstrate compliance.

Reduced Costs

Lower your Identity security costs by optimizing resources and eliminating redundant systems. Atos helps you consolidate identity security systems, reduce IT infrastructure costs, and minimize the risk of security breaches, leading to significant cost savings.

Increased Efficiency

Streamline Identity security and access management processes and reduce administrative overhead with our automated solutions. Automate user provisioning and de-provisioning, access requests, and certification processes, freeing up your IT team for strategic initiatives.

Business Enablement

Enable secure, efficient, and user-friendly ways of doing business to attract and retain customers and improve the bottom line. By simplifying access for partners, customers, and employees, you can accelerate business growth and improve customer satisfaction.

Our Identity Security Services

Atos Identity security offers a wide range of services to address your identity security and access management needs:

Identity Security Consulting and Advisory

Our experienced consultants can help you assess your current identity security posture, identify gaps, and develop a roadmap for improvement. We will also help you implement best practices and ensure that your Identity security and access management solution is aligned with your business goals.

Identity Security Implementation and Integration

We can seamlessly integrate our Identity security solutions into your existing infrastructure, ensuring minimal disruption to your operations. We leverage intellectual property (IP) and accelerators to reduce costs and time to value.

Identity Security Managed Services

Our managed services provide ongoing support and maintenance for your Identity security and access management solutions, freeing up your IT team to focus on other priorities. Continuous improvements are built-in to reduce your identity-related risk now and in the future.

Identity Security as a Service

Our cloud-based Identity security solutions offer flexibility and scalability, allowing you to pay only for what you need. Our solutions are easy to deploy and manage, and they can be scaled to meet your changing needs.

Our Collaborative Identity Security Framework

We follow a proven methodology to deliver Identity security and access management solutions that meet your expectations and goals. Our framework consists of four phases:

- 1 Consultative Engagement:** We begin with a deep-dive assessment of your current Identity security practices, challenges, and business goals.
- 2 Cutting-Edge Identity Security Framework:** We leverage our products and services IP, including Eviden's Evidian: Suite of products, and best-in-class technologies from our partner network.
- 3 Industry-Specific Implementation:** We tailor our Identity security solutions to meet your unique industry requirements.
- 4 Collaborative Engagement:** We work in partnership with you, emphasizing knowledge transfer, seamless integration, and business value.

Key Service Features of Atos Identity Security

Identity Governance: Gain complete visibility and control over all identities within your organization and their associated access. Our identity governance solutions provide a centralized view of all identities and their associated access, making it easy to manage and control access permissions.

Privileged Access Management: Securely control and monitor access to privileged accounts to prevent unauthorized access to critical systems. Our PAM solutions can help you manage and control privileged accounts, such as those used by IT administrators, to prevent unauthorized access to critical systems.

Access Management: Ensure that users have appropriate access to resources based on business need. This is achieved through role-based access control (RBAC) and attribute-based access control (ABAC), which enforce policies to ensure that only authorized users can access specific resources.

Identity Analytics: Leverage advanced analytics and AI to enhance user experience, improve automation, and detect and respond to potential threats in real-time. This helps you identify and mitigate potential threats, such as compromised accounts or insider threats.

Digital Identity	Access Management	Identity and Data Governance	Identity Threat Detection and Response
Public Key Infrastructure (PKI)	Federated Identity / Single sign-on	Identity Governance and Administration (IGA)	Posture/Vulnerability Management
Certificate Lifecycle Management	Customer IAM (CIAM)		
Identity Proofing	Privileged Access Security (PAS/PAM) / JIT PAM	Data Access Governance (DAG)	Behavior Analytics/ Anomaly Detection
Decentralized Identity / Self-Sovereign ID	Endpoint Privilege Management		
Directory Services	DevOps Secrets Management	Cloud Infrastructure and Entitlement Management (CIEM)	
	Multi-Factor Authentication		
Artificial Intelligence / Machine Learning / Analytics			

Key Service Features of Atos Identity Security

Our Identity security and access management solutions are designed to address the specific needs of different industries and use cases. We offer solutions for:

 Healthcare	 Finance	 Retail	 Manufacturing	 Government
Protect sensitive patient data and comply with HIPAA regulations.	Secure financial transactions and meet regulatory requirements.	Safeguard customer data and prevent fraud.
